# USER INTERFACE AND DESIGN

## Creating Storyboards Using Balsamiq

**AIM:**

The aim of this experiment is to create storyboards representing the user flow for a **Student Attendance Mobile Application** using Balsamiq Wireframes.

**PROCEDURE:**

1. Tool Used: Balsamiq Wireframes
2. A new project was created and multiple mobile screens were added.
3. Each screen represents a step in the attendance tracking process.
4. UI components such as buttons, text fields, icons, and navigation bars were used.
5. The design was kept simple and focused on usability and user interaction.
6. All screens were arranged in sequence to represent the user flow.

**USER FLOW:**

- Login → Dashboard
- Dashboard → Mark Attendance → Dashboard
- Dashboard → View Attendance Details
- Dashboard → Leave Request
- Dashboard → Profile

## SCREEN DESCRIPTIONS

### 1. Login Screen

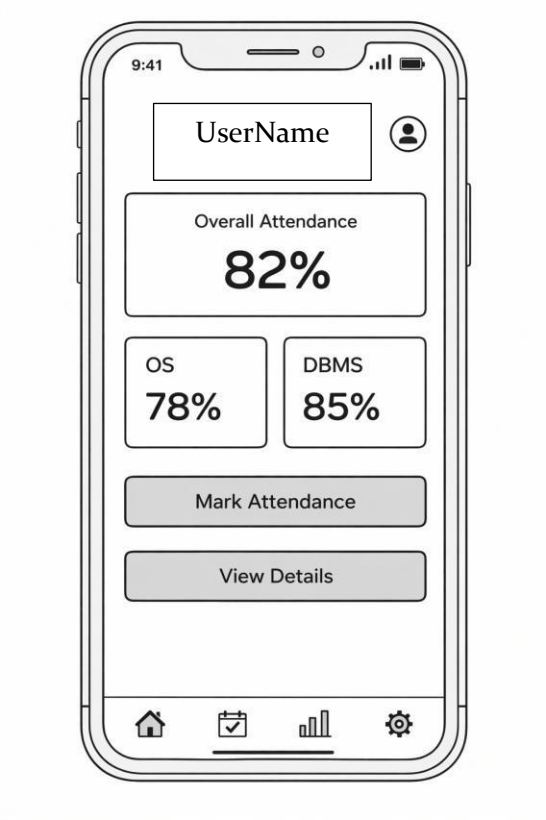
**Components:**

- App title (Attendance Tracker)
- Username field
- Password field
- Login button
- Forgot Password option

**Purpose:**

This screen allows users to log into the application securely using their credentials.

**2. Dashboard Screen**



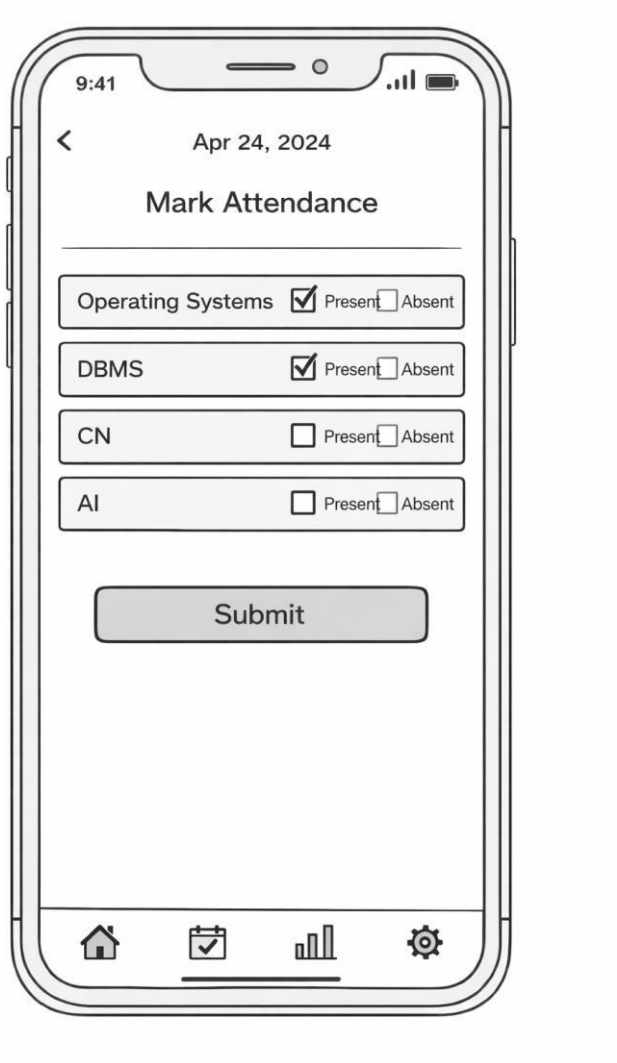
**Components:**

- Student name
- Overall attendance percentage
- Subject-wise attendance cards
- “Mark Attendance” button
- “View Details” button
- Bottom navigation bar

**Purpose:**

This is the main screen where users can view their attendance summary and access other features.

### 3. Mark Attendance Screen



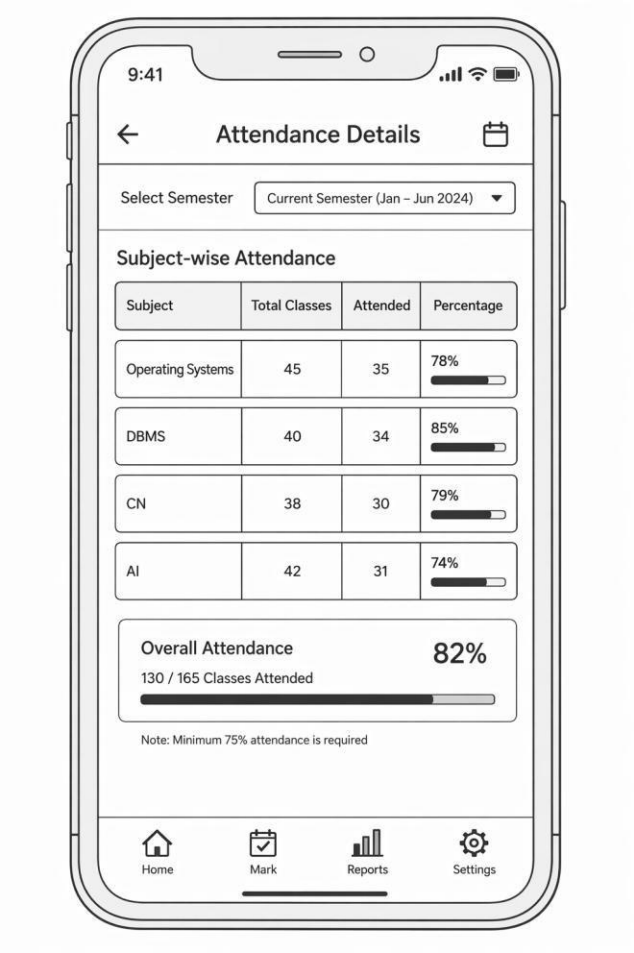
**Components:**

- List of subjects (OS, DBMS, CN, AI)
- Present / Absent checkboxes
- Date display
- Submit button

**Purpose:**

This screen allows users to mark attendance for each subject on a given day.

### 4. Attendance Details Screen



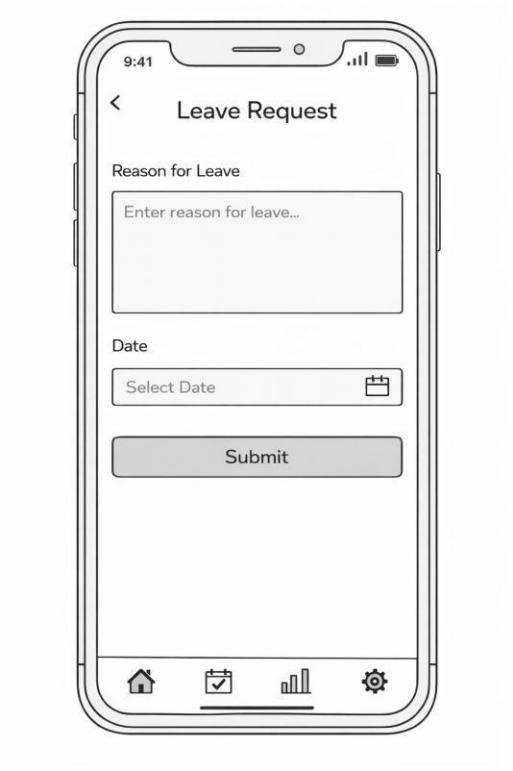
**Components:**

- Student details (Name, Roll No, Department)
- Subject-wise attendance table
- Total classes, attended classes, percentage
- Progress bars
- Overall attendance summary

**Purpose:**

Provides a detailed view of attendance performance across all subjects.

### 5. Leave Request Screen



**Components:**

- Reason input field
- Date picker
- Submit button

**Purpose:**

Allows users to request leave by entering the reason and selecting a date.

### 6. Profile Screen

**Components:**

- Profile icon
- Name
- Roll number
- Department
- Logout button

**Purpose:**

Displays user information and provides an option to log out of the application.

**RESULT:**

Thus, the storyboard for the **Student Attendance Mobile Application** was successfully created using Balsamiq, demonstrating a clear and logical user flow.
